

# ***IPL 2008 - 2020 ANALYSIS REPORT***

BY ARPIT CHAUDHARY

**A warm welcome to all of you for this special  
PowerPoint presentation on the Indian  
Premier League (IPL) from 2008 to 2020.**

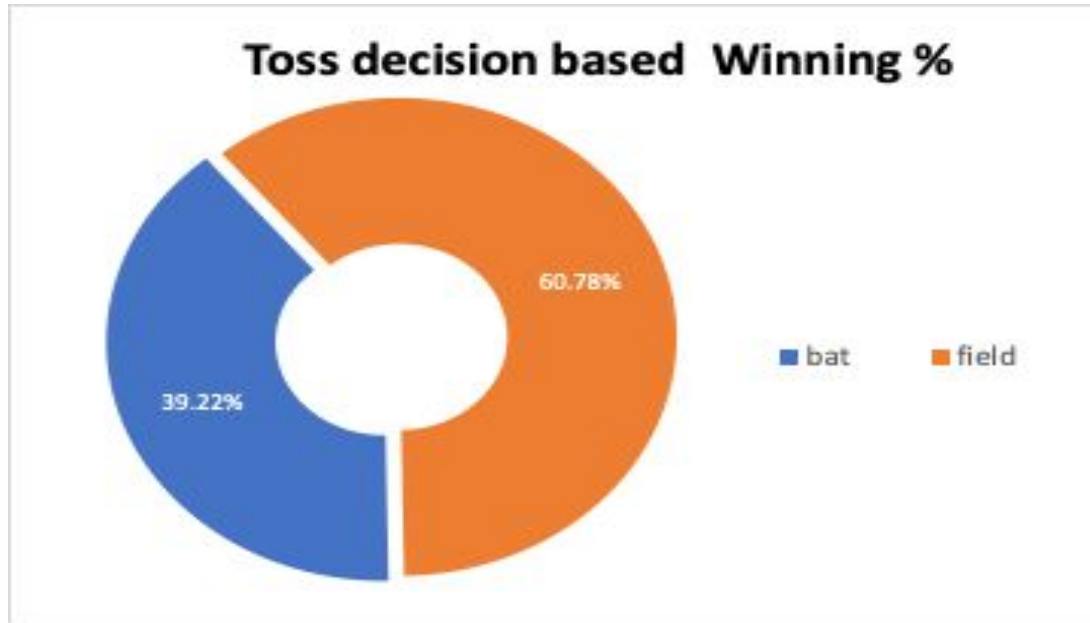

**The next graph represents the count of toss winners choosing to bat or field in a cricket tournament.**

- The graph consists of two columns: "bat" and "field," representing the count of times the toss winner chose to bat or field, respectively.
- The "X AXIS" represents the teams participating in the tournament.
- The "Y AXIS" indicates the categories of choosing to bat or field.

# WINNERS ACCORDING TO BATTING AND BOWLING.

# WINNING BASED ON TOSS DECISIONS

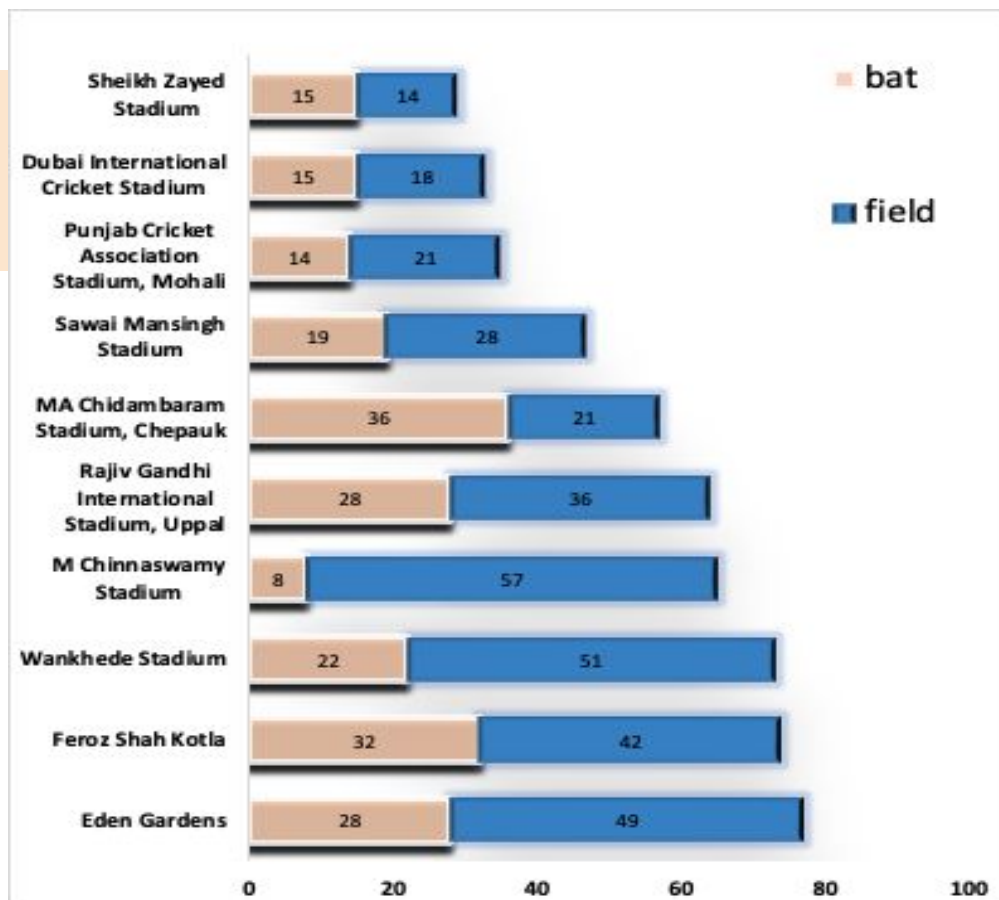

**The analysis provided shows the distribution of the count of winners based on their decision to bat or field:**

- 39.22% of the winners chose to bat.
- 60.78% of the winners chose to field.
- This analysis suggests that, in the given dataset, a higher percentage of winners opted to field rather than bat.

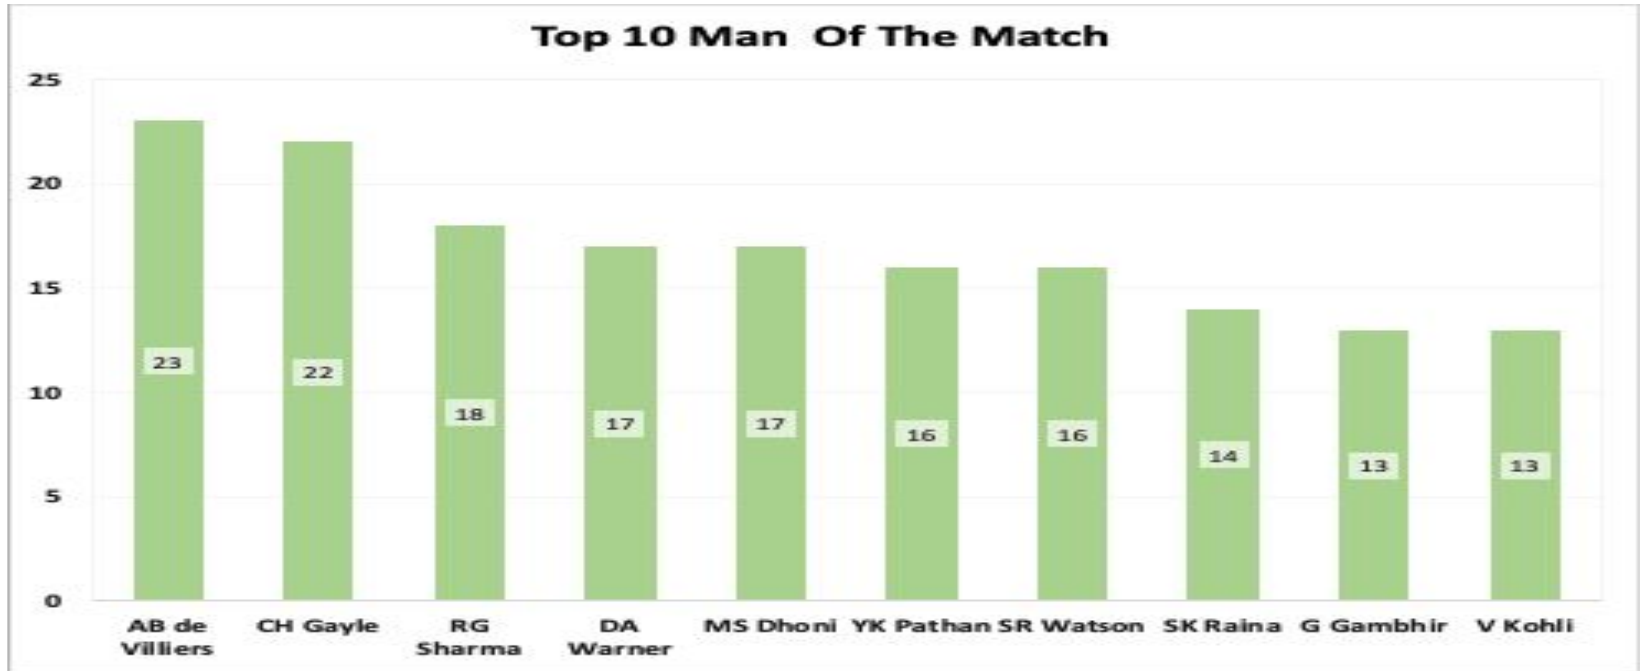

In the next given picture, we have a visualized chart representing the count of winners in cricket matches at different stadiums. The chart has two column labels: "bat" and "field," which indicate the number of times the winning team batted first and the number of times they fielded first, respectively. The "Y AXIS" represent the different stadiums
